

COOPERATIVE ECONOMIC INSECT SURVEY REPORT  
Glenn A. Salsbury, Survey Entomologist

Report 2, Volume 52  
February 25, 2005

TERMITES: Winged termites were caught in a flight intercept trap this past week.

HACKBERRY NIPPLEGALL MAKER: Several specimens were caught in a flight intercept trap the week of Feb. 14. Additional specimens were caught this week.

HESSIAN FLY: None were found in the following counties: Osage, Jefferson, Shawnee and Cherokee. A field in Kiowa County had ten percent of the tillers infested. Five fields checked in Allen County ranged from 0-5 percent of the tillers infested. Much of the wheat in Southeast Kansas was planted late because of wet fields last fall.

STORED GRAIN PESTS: None were found in sunflowers sampled in Sherman and Thomas counties.

Contributors to this report: Meiwes, Salsbury, White, Hilbert, Buhler and Elbrader
